

**Palm multi-connector serial communication & charger cable
COMPDA**

Features

- Serial communication between Palm Tungsten E2 and ISAAC Recorder
- Power supply and charge the Palm Tungsten E2

Description

COMPDA

Built with DB9M military spec connector to be used with Recorder V7

COMPDA-DR8

Built with Deutsch receptacle (for harsh environmental applications) to be used with Recorder V8

Installation

- Connect the multi-connector to the Palm
- Connect the DB9 or Deutsch connector to COM1, COM2 or COM3 of the Recorder
- Verify that cable is not pinched or stretched by surrounding moving parts.
- Do not bend cable with curvature radius smaller than 1.60" [40 mm].
- Refer to Palm PDA command and Real Time Display – User Guide to configure the Recorder
