

Solid Waste Management

ISAAC Instruments' Data Recorder Units (DRU) are rugged and easy to install. The cost of maintenance and management is reduced while acquiring more data.

Operations Management

- Dispatching and monitoring
- Analysis of citizens' complaints
- Detailed activities per site

Fuel Savings

- Equipment performance assessment
- Routing optimization
- Follow-up on drivers' training

Maintenance Management

- Vehicle hour meter monitoring
- Vehicle odometer monitoring
- List of fault codes (engine, transmission, etc.)

The Company :

Privately-held Canadian company which designs and manufactures novel vehicle telemetry solutions exported internationally.

The Hardware :

Compact, robust and reliable. Inspired from the motorsports and aeronautics industries. CE, BNQ, MIL-STD-810, IP65 certifications.

The Software :

User-friendly and user-configurable. Client-server application using the latest technologies, making it possible to share SQL databases.
